

# Hand support

Model 935.200

Image courtesy Meander Hospital the Netherlands

## Main applications

- Research
- Hospital

The hand support is specially designed to facilitate a comfortable position for the patient during medical procedures, while maintaining proper alignment. This product gives a good stability and reproducibility regarding imaging of the hands in a fixed position.

## Specifications

Overall dimensions (l x b x h) 120 x 48 x 13 cm approx.
